SUMMARY & RECOMMENDATIONS OF PUBLIC ACCOUNTS COMMITTEE Number 27/2016 on Thursday, 8 December 2016

6. SUMMARY OF PUBLIC ACCOUNTS COMMITTEE

PAC is in the opinion that the government's decision for KPDNKK to take over the management of cooking oil subsidies from KPPK is relevant because cooking oil is a consumer product under the purview of KPDNKK.

Beside that, cooperation between the Government's Ministries, Departments, agencies in the enforcement needs to be strengthen so that leakages will not occur that could force the government to spend a bigger sum on the subsidy for COSS.

7. RECOMMENDATIONS OF PUBLIC ACCOUNTS COMMITTEE

For future improvement, PAC recommends the following:

- 7.1 To ask the stakeholders to review the cooking oil monitoring system and mechanism more effectively.
- 7.2 To improve monitoring through enforcement between the Government's Ministries, Departments, agencies, and to involve NGOs such as the Consumers Association to prevent shortage of cooking oil in the local market thus causing the Government to bear large amounts of subsidies.
- 7.3 To ensure cooking oil quota is given to a truly qualified entrepreneur with their own factory and a good track record.
