

TSAI SONG LIM

9th December 2011

Dear Sir/Mdm,

This is my sincere personal proposals to improve the election process.

1. The counting can be done faster and effectively by electronic counting machine (like used by the bank in counting notes).
2. The ballot paper can be improved by adding small box so that can be detected by scanner digitally to determine which candidate is selected. Just blacken the small box for that candidate on the ballot paper
3. The ballot paper can also be improved by scratching off the tinned silvery box of the candidate to be selected (like used in the parking coupon)
4. All citizens are automatically registered as voters upon reaching 21 years of age and based on their ic addresses.
5. Counting to start immediately after polling station closed. Once counting finished, the result of counts send by satellite phone (if it is in rural area) to main polling center.
6. Apart from public civil servant, those individuals from private sectors are to be hired to be involved in helping the election commission in the election process. They are to be involved in election commission duties i.e. manning polling stations, observing election process, counting votes, ensuring election is carried out orderly.
7. Election Commission to have committee members comprising of all political parties, NGO, election bodies, Individual, etc.
8. Election Day must be declared as a Public Holiday.
9. Election Day date to be fixed every 5 yrs rather than declared at a short notice. This is so that people can plan to return back for election.

Thank you.

Yours sincerely,

(as individual)
